Chandler Squires

chandlersquires.com

Contact Information

2277 Shady Ave
Pittsburgh, PA 15217

chandlersquires18@gmail.com
1-210-412-2105

Current Role

Postdoctoral Research Associate
Machine Learning Department, Carnegie Mellon University

Research Interests

Theoretical foundations and methodology (machine learning/statistics): Causality, representation learning, experimental design, decision-centric learning, neurosymbolic AI.
Scientific and engineering applications: Cellular biology, genomics, healthcare, manufacturing.

Education

Ph.D., Electrical Engineering and Computer Science — **February 2025**
Massachusetts Institute of Technology, Cambridge, MA, USA

Thesis Advisors: David Sontag, Caroline Uhler

M.Eng., Electrical Engineering and Computer Science — **September 2019**
Massachusetts Institute of Technology, Cambridge, MA, USA

Thesis Advisor: Caroline Uhler

B.S., Electrical Engineering and Computer Science — **June 2018**
Massachusetts Institute of Technology, Cambridge, MA, USA

Selected Publications

1. **Squires, C.**, Ravikumar, P., *A Unifying Framework for Unsupervised Concept Extraction*, AISTATS 2026.
2. Varıcı, B.*, **Squires, C.***, Ravikumar, P., *Causal Representation Learning*, Neurosymbolic AI: Foundations and Applications (2026).
3. **Squires, C.***, Choo, D.*, Bhattacharyya, A., Sontag, D., *Probably Approximately Correct High-Dimensional Causal Effect Estimation Given a Valid Adjustment Set*, CLeaR 2025.
4. **Squires, C.***, Seigal, A.*, Bhate, S., Uhler, C., *Linear Causal Disentanglement via Interventions*, ICML 2023.
5. **Squires, C.**, Uhler, C., *Causal Structure Learning: A Combinatorial Perspective*, JoFCM 2022.

Teaching Experience

Carnegie Mellon University (Guest Lectures)

1. CMU 10708, Probabilistic Graphical Models *(Instructor: Andrej Risteski)* — **S. 2026**
2. CMU 10747, Neurosymbolic AI *(Instructor: Pradeep Ravikumar)* — **F. 2025**
3. CMU 10708, Probabilistic Graphical Models *(Instructor: Andrej Risteski)* — **S. 2025**
4. CMU 10716, Advanced ML *(Instructor: Pradeep Ravikumar)* — **S. 2025**
5. CMU 10741, Representation Learning *(Instructor: Pradeep Ravikumar)* — **F. 2024**

Massachusetts Institute of Technology (Instructor)

1. 6.S091, Causality (*Co-instructors: Katie Matton & Jiaqi Zhang*, link) — **Jan. 2024**
2. 6.S091, Causality (link to lecture notes and recordings) — **Jan. 2023**

Massachusetts Institute of Technology (Teaching Assistant)

1. 6.437, Inference and Information *(Instructors: Gregory Wornell & Polina Golland)* — **S. 2019**
2. 6.438, Algorithms for Inference *(Instructor: Guy Bresler)* — **F. 2018**

Mentorship

- **CMU PhD Students:** Juyong Kim, *2024–2025 (now ML engineer at Waymo)*; Soheun Yi, *2025–present*; Duncan Soiffer, *2025–present*; Hastyn Doshi, *2026–present*
- **CMU Master's Students:** Alex Guan, *2025–present*; Avi Amalanshu, *2025–present*; Yizhou Li, *2025–present*; Eddie Gao, *2025–present*
- **CMU Undergraduates:** Faraz Mizra, *2024–2025*; Leo Li, *2025–present*
- **CMU Visiting Students:** Annika Viswesh, *2025–present (visiting undergraduate from Caltech)*; Allan Pais, *2025–present (research engineer)*; Vansh Ramani, *2025–2026 (visiting undergraduate from IIT Delhi)*; Jianing Zhu, *2025–2026 (visiting PhD student from HKU)*
- **MIT Undergraduates:** Ryan Welch, *2023–2024 (now CS PhD at Stanford)*; Michael Truell, *2021–2023 (now CEO at Cursor)*; Sathwick Karnik, *2020–2022 (now PhD at Stanford)*; Joshua Amaniampong, *2021–2022 (now researcher at Citadel)*
- **MIT Master's Students:** Cathy Cai, *2023–2024 (now EECS PhD at MIT)*; Eshaan Nichani, *2020–2021 (now ECE PhD at Princeton)*; Neha Prasad, *2020–2021 (now ML engineer at Rillet)*; Annie Yun, *2020–2021 (now developer at HRT)*
- **MIT Visiting Students:** Álvaro Ribot, *2022–2023 (now Applied Math PhD at Harvard)*

Invited Talks

1. NeurIPS 2026 Workshop: Interpretability as a Science (link) **Scheduled: Dec. 2026**
2. INFORMS 2026 Session: Pragmatic Causal Inference (link) **Scheduled: Nov. 2026**
   "Causal representation learning: a pragmatic viewpoint"
3. U. of Toronto: Mathematics of Machine Learning Seminar (link) **Sep. 2026**
   "Structured generalization: From identifiability theory to practical limitations"
4. U. of Pittsburgh: Department of Biomedical Informatics Colloquium (link) **Oct. 2025**
   "Causal representation learning for biology"
5. INFORMS 2024 Session: Causal Inference (link) **Oct. 2024**
   "Decision-centric causal structure learning: An algorithm for data-driven covariate adjustment"
6. NeurIPS 2023 Workshop: Causal Representation Learning (link) **Dec. 2023**
   "Causal imputation and causal disentanglement"
7. Valence Labs: Molecule Modeling and Drug Discovery (M_2D_2) **Aug. 2023**
   "Identifiability of causal models and applications to Perturb-seq data" (recording)
8. SIAM OP: Applications of Optimization for Causal Structure Learning (link) **Jun. 2023**
   "Linear causal disentanglement via interventions"
9. Colloquium on When Causal Inference meets Statistical Analysis (link) **Apr. 2023**
   "Beyond ICA: Causal disentanglement via interventions"
10. ICML 2022 Workshop: Principles of Distribution Shift (link) **Jul. 2022**
    "Causal structure learning with unknown mechanism shifts"
11. IMS 2022 Annual Meeting: Graphical Models Contributed Session (link) **Jun. 2022**
    "Causal structure discovery between clusters of nodes induced by latent factors"
12. First Interdisciplinary Workshop on Interactive Causal Learning **Jun. 2022**
    "The query complexity of verifying a causal graph from single-node interventions"
13. Simons Institute Semester on Causality: Causality Boot Camp (link) **Jan. 2022**
    "Introduction to experimental design for causal discovery" (recording)
14. U. of Amsterdam: AI4Science Colloquium (link) **May 2021**
    "Predicting gene expression across cell types and drugs" (recording)

Invited Panels

1. AISTATS 2026 Workshop: Causality in the Age of AI Scaling (link) **May 2026**
2. Emory University AI.Humanity Conference (link, recording) **Mar. 2026**

Service

Assistant organizer, Identifiable Representation Learning workshop at BIRS. (link) **2026**

Workflow chair, Conference on Uncertainty in Artificial Intelligence (UAI). **2026**

Area chair, Conference on Neural Information Processing Systems (NeurIPS). **2025 & 2026**

Publication chair, Causal Learning and Reasoning (CLeaR). **2025 & 2026**

Reviewer (Conferences), NeurIPS, ICML, UAI, AISTATS, NeuS. **2019–present**

Reviewer (Journals), JMLR, JOCI, TMLR, Bernoulli. **2019–present**

Communication coach, MIT EECS Communication Lab **2021–2024**

Provided over 100 hours of one-on-one feedback to EECS students and postdocs, focusing on technical communications such as conference papers, oral presentations, posters, and fellowship applications.

Ran workshops on scientific writing and presentation skills for EECS graduate students.

Organizer, Causal Representation Learning Reading Group (link) **2021–2022**

Organized a bi-weekly reading group with members from over 20 universities.

Treasurer, IDSS Student Council, MIT **2020–2021**

Tea talk committee member, LIDS, MIT **2020–2021**

Organized a series of weekly student talks within the LIDS community.

Industry Experience

Summer Researcher, Microsoft Research, Redmond, WA, USA **2021 (Jun.–Aug.)**

Developed a contrastive learning framework for improved multivariate time-series prediction in settings with causal relationships between variables.

Summer Researcher, IBM, Cambridge, MA, USA **2019 (Jun.–Aug.)**

Developed a theoretical characterization of optimal experimental design strategies for learning causal graphical models.

Data Science Intern, nference, Cambridge, MA, USA **2018 (Jan.–Aug.)**

Led both frontend and backend development for two new apps aimed at protein annotation and alignment and patient segmentation; analyzed custom statistical models of protein sequences.
